SUBJECT: Revisions to COMAR 10.07.14—Medication Management and Administration/Consultant Pharmacy Review

This is in follow up to our transmittal dated January 14, 2009, through which we directed your attention to amendments to regulations governing assisted living providers in Maryland. (See www.dhmh.state.md.us/ohcq/ for the January 14th transmittal). While I briefly mentioned revisions to 10.07.14.29, Medication Management and Administration (enclosed), but indicated that there would be follow-up information on this requirement. The information is presented here.

Attached you will find a summary checklist which highlights revisions applicable to medication management. Among other things, the revisions require that individuals receiving nine or more medications, defined as prescription, over the counter, herbals, vitamins and as needed medications, a licensed pharmacist must conduct on-site review of all medications, prescriber orders, and resident records. The review must occur every six months (facilities may “group” reviews together on the same day to avoid multiple trips by a pharmacist, even if it means some disruption of the 6-month rule for some residents). A list of consultant pharmacists who are available to perform pharmacy review is attached. OHCQ surveyors will anticipate that providers will be in compliance with this requirement on or before July 1, 2009.

While some of you may have experience working with pharmacists and realize the benefits of having them as a healthcare provider, for others this may be new. Consultant pharmacists are invaluable resources to help you not only identify and overcome medication related issues for residents at your facility. They can also help you to minimize medications errors, improve knowledge regarding medications, optimize medication storage and administration which will hopefully improve the medication safety in your facility. Additionally, the written information and recommendations provided by a consultant pharmacist about medication safety and practices will be helpful to the facility manager and delegating nurse as part of the facility’s six-month quality assurance review, required by COMAR 10.07.14.13.

If you have concerns about pharmacist availability, please call our offices. If you are dissatisfied with the cost quoted by a pharmacist on the list, we would recommend calling other pharmacists to compare costs.

The new regulations also require staff to count and record controlled drugs before the close of each shift. In a small facility, if a staff person works a 24 hour “shift,” the drugs should be counted at the conclusion of the 24 hours and as new staff sign in. The regulations require Scheduled II and III medications to be maintained under a double lock system—a list of Schedule II and III medications is attached to this memorandum on the OHCQ website.

The list of Frequently Asked Questions and answers on the revised Assisted Living regulations, as well as the training dates statewide can be found on the OHCQ website.

A. All staff who administer medications to residents shall have completed the medication administration course that is taught by a registered nurse who is approved by the Maryland Board of Nursing.

B. The assisted living manager shall document completion of the medication technician training in the personnel file or other readily available record of each unlicensed staff member who administers medications.

C. All medications shall be administered consistent with applicable requirements of COMAR 10.27.11.

D. An assisted living manager shall ensure that the resident's initial assessment process identifies whether a resident:

(1) Is capable of self-administration of medication;

(2) Is capable of self-administration of medication, but requires a reminder to take medications or physical assistance with opening and removing medications from the container, or both; or

(3) Requires that medications be administered by the assisted living program staff.

E. For a resident who is capable of self-administration or, although capable, requires a reminder or physical assistance, as stated in §D(2) of this regulation, the assisted living manager shall ensure that the resident is reassessed by the delegating nurse quarterly for the ability to safely self-administer medications with or without assistance.

F. Medication Review Upon Admission.

(1) The assisted living manager shall consult within 14 days of a resident's admission with the individuals set forth in §F(2) of this regulation to review a new resident's medication regime.

(2) The medication review may be conducted by a:

(a) Primary care physician;

(b) Certified registered nurse practitioner;

(c) Certified registered nurse midwife;

(d) Registered nurse, who may be the delegating nurse; or

(e) Licensed pharmacist.

G. The purpose of the review required by §F of this regulation is to review with the assisted living manager or designee:

(1) A resident's current medication profile, including all prescription and nonprescription medications and tube feedings;

(2) The potential that current medications have to act as chemical restraints;

(3) The potential for any adverse drug interactions, including potential side effects from the medications; and

(4) Any medication errors that have occurred since admission.

H. The assisted living manager, or designee, shall ensure that the review required by §F of this regulation is documented in the resident's records, including any recommendations given by the reviewer.

I. Pharmacy Review.

(1) The assisted living manager of a program shall arrange for a licensed pharmacist to conduct an on-site review of physician prescriptions, physician orders, and resident records at least every 6 months for any resident receiving nine or more medications, including over the counter and PRN (as needed) medications.

(2) The pharmacist's review shall include, but is not limited to, whether:

(a) The program is in compliance with Board of Pharmacy's requirements for packaging of medications;

(b) Each resident's medications are properly stored and maintained;

(c) Each resident receives the medications that have been specifically prescribed for that resident in the manner that has been ordered;

(d) Based on available information, the desired effectiveness of each medication is achieved, and, if not, that the appropriate authorized prescriber is so informed;

(e) Any undesired side effects, potential and actual adverse drug reactions, and medication errors are identified and reported to the appropriate authorized prescriber;

(f) The resident has a medical condition as documented in the resident's records that is not currently being treated by medication;

(g) There is drug use without current indication in the resident's records of a medical condition that warrants the use of the drug;

(h) There is drug overuse that is causing side effects as documented in the resident records;

(i) Current medication selections result in inappropriate drug dosage;

(j) The resident may be experiencing drug interactions;

(k) The resident is receiving medication, either prescribed or over-the-counter medications, as well as herbal remedies that could result in drug-drug, drug-food, or drug-laboratory test interactions;

(l) Administration times of medication need to be modified to address drug interactions or meal times, or both;

(m) The resident records need to be reviewed to assure that periodic diagnostic monitoring required by certain medications have been performed; and

(n) The resident's medication regimens need to be reviewed to determine if more cost-effective medications are available to treat current medical conditions.

(3) The pharmacist shall document the pharmacy review as required under this section in each resident's chart and this documentation shall be reviewed every 6 months as part of the assisted living program's quality assurance activities as required in Regulation .13 of this chapter.

J. The person conducting the on-site review under §F or I of this regulation shall recommend changes, as appropriate, to the appropriate authorized prescriber and the assisted living manager or designee.

K. If a resident requires that staff administer medications as defined in Regulation .02B(3) of this chapter, and the administration of medications has been delegated to an unlicensed staff person pursuant to COMAR 10.27.11, the assisted living manager shall comply with COMAR 10.27.11 by arranging for an on-site review by the delegating registered nurse at least every 45 days. The delegating nurse shall make appropriate recommendations to the appropriate authorized prescriber, and the assisted living manager or designee.
